

## Electricity Energy Management

The Company has established an Energy Conservation Policy to guide electricity management and promote efficient and optimal energy use. The Company also implemented the “Be Healthy & Save Energy” campaign, encouraging employees to use stairs instead of elevators.

In 2024, the Company’s total electricity consumption was 4,891,452 kilowatt-hours (kWh), representing a 1.80% decrease compared with the previous year. To further promote energy-saving behavior, the Company implemented the following measures:

- Deactivating elevators serving Floors 3 and 4 to reduce electricity consumption without affecting customer convenience.
- Automatic A/C scheduling to switch off during 12:00–13:00 hrs. and from 17:30 hrs. onwards.
- Promoting an A/C setpoint of 26°C.
- Preventive maintenance in line with the maintenance plan to minimize energy loss/leakage.
- Turning off lights during lunch breaks and using only essential lighting when necessary.
