

## Supplier Engagement in Sustainable Business Development

### Sustainability (ESG) Awareness Enhancement Project

This project aims to develop and elevate the role of security personnel in promoting the Company's business operations toward a sustainable direction. It seeks to enhance awareness and engagement of security personnel in supporting sustainable development across safety, social, and environmental dimensions, thereby improving organizational security effectiveness and strengthening customer confidence.

### Housekeeping Staff Training Program on the Use of Environmentally Friendly Products and Waste Segregation

This program aims to provide housekeeping staff with knowledge on the use of safe and environmentally friendly products, as well as proper waste segregation practices to reduce environmental impacts. It also seeks to foster appropriate and efficient waste segregation behaviors, promoting sustainable practices in minimizing environmental impact.
